- Able to prioritise own workload
- Logical way of thinking
- Strong numeracy skill
- Organization skill
- Able to work in a team or on my own
- Ms Office and computer literacy
- Team work
- Analytical skills

PROFESSIONAL EXPERIENCE

I started my journey in the world of Cybersecurity in 2021, I am motivated and result driven person, seeking for a challenging position as a Junior Security Analyst or similar role in IT. Offering strong communication, ability to learn fast, keeping deadlines, providing high accuracy, analytical skills, problem solving attitude and attention to details. Able to work in a team or on my own.

Despite currently having no professional experience, I have actively pursued self-learning opportunities, delving into areas such as network security, cryptography fundamentals, and ethical hacking techniques. I thrive on the challenge of solving complex problems and remain committed to continuous learning and skill enhancement.

In my previous jobs, I learned a lot of essential skills, like communication, team-work, problem solving skills, analytical skills, customer service and focus skills, attention to details.
